DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the applicant's attorney, Mr. Allan Lowe, on May 12, 2005.

The application has been amended as follows:

In claim 5, line 7, the word "of" has been deleted.

2. The indicated allowability of claims 5, 13, 17, 21, 23, 25, and 27 is withdrawn in view of the newly discovered reference(s) to Takahashi Shoji (Japanese Publication No. 08-318050). Rejections based on the newly cited reference(s) follow.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 5, 13, 17, 21, 23, 25, and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi Shoji (Japanese Publication No. 08-318050).

Shoji teaches a video game method and apparatus (or computer readable medium that enables the computer to perform the method thereto) for proceeding with a game in such a way that a player character and a game character communicate in accordance with an operation of a player, in which the game character issues a voice message, comprising: inputting and setting (or means thereto) by the player a character string representing a way of calling the player character in accordance with an operation of the player (abstract; page 4, paragraphs 4 and 5; page 12, paragraphs 6-11); creating at least one voice message of the game character calling to the player character, on the basis of the set character string representing the way of calling the player character or a preset calling word, wherein game processor is adapted to transmit a plurality of accent types of the voice message to be displayed to the player to enable the player to select at least one accent type at will (Fig. 2; page 5, paragraphs 8-10; page 13, paragraphs 11-14); a memory (RAM) connected to said processor for storing said voice message created (page 5, paragraph 11), and wherein said processor is adapted to vary at least one of the intonation, volume and total average pitch of the voice message stored in said memory in accordance with the progress of the game, when the game character calls to the player character, wherein the accent types to be displayed to the player are prepared in accordance with the number of characters of the set character string (pages 7 and 11).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binh-An D. Nguyen whose telephone number is 571-272-4440. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Xuan Thai can be reached on 571-272-7147. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
